PROJECT: **Aralist (To-do-list Application)**

Program Execution

1. Name input of the user

```
30        Scanner input = new Scanner(System.in);
31        System.out.print("Please Enter Your Name: ");
32        String line = input.nextline();
33        System.out.println("Welcome to Aralist " + line + "!");
34        System.out.println("Access your Task List");
```

```
Please Enter Your Name: Dominique
Welcome to Aralist Dominique!
Access your Task List
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option:
```

3. Adding New Task

```
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 1
Enter The Task: Printing
Enter Due Date Ex.(2025-11-08): 2025-12-07

--- Current Task List ---
1. Task: Printing        Due Date: 2025-12-07    Task Created: 11:50:19.
```

4. Deleting a Task

```
--- Current Task List ---
1. Task: Printing        Due Date: 2025-12-07    Task Created: 11:50:19.213796800
2. Task: Deleting        Due Date: 2025-12-08    Task Created: 11:51:59.044195900
3. Task: Sorting         Due Date: 2025-12-09    Task Created: 11:52:22.216932200
4. Task: Checking        Due Date: 2025-12-10    Task Created: 11:52:42.193058300
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 2
Enter The Task Number You Want to Delete: 2
```

```
--- Current Task List ---
1. Task: Printing        Due Date: 2025-12-07    Task Created: 11:50:19.213796800
2. Task: Sorting         Due Date: 2025-12-08    Task Created: 11:51:59.044195900
3. Task: Checking        Due Date: 2025-12-09    Task Created: 11:52:22.216932200
```

5. Sorting the tasks by Date and Time

```
--- Current Task List ---
1. Task: Printing        Due Date: 2025-12-07    Task Created: 11:50:19.213796800
2. Task: Sorting         Due Date: 2025-12-08    Task Created: 11:51:59.044195900
3. Task: Checking        Due Date: 2025-12-09    Task Created: 11:52:22.216932200
4. Task: Display         Due Date: 2025-12-10    Task Created: 11:52:42.193058300
5. Task: Typing  Due Date: 2025-12-11    Task Created: 11:54:04.761140500
6. Task: Writing         Due Date: 2025-12-08    Task Created: 11:55:56.323022800
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 3

--- Sorted Task List ---
1. Task: Printing        Due Date: 2025-12-07    Task Created: 11:50:19.213796800
2. Task: Sorting         Due Date: 2025-12-08    Task Created: 11:51:59.044195900
3. Task: Writing         Due Date: 2025-12-08    Task Created: 11:55:56.323022800
4. Task: Checking        Due Date: 2025-12-09    Task Created: 11:52:22.216932200
5. Task: Display         Due Date: 2025-12-10    Task Created: 11:52:42.193058300
6. Task: Typing  Due Date: 2025-12-11    Task Created: 11:54:04.761140500
```

6. Searching for a task

```
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 4
Enter the task to search: Display

--- Task Found: ---

Task: Display    Due Date: 2025-12-10    Task Created: 11:52:42.193058300
```

7. Checking or Completing a task

```
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 5

--- Overdue Tasks ---
No overdue tasks.

--- All Tasks ---
1. Task: Printing        Due Date: 2025-12-09    Task Created: 14:11:10.117256
2. Task: deleting        Due Date: 2025-12-10    Task Created: 14:11:25.007631800
3. Task: seeing  Due Date: 2025-12-11    Task Created: 14:11:35.611690800
```

8. Exit the application

```
Task List
(1) Add New Task
(2) Delete Task
(3) Sort Automatically By Date and Time
(4) Search Task
(5) Check/Complete Tasks
(6) Exit
Choose option: 6
Goodbye Dom!
```

CODE EXPLANATIONS:

1. The user inputs their name, and the program then prints an introduction with the username as well as the options they might want to do.
2. Using a switch case, the user has the option to choose what they want to do.
3. The program consisted of an array list so that the user can input an infinite number of tasks
4. We also utilized utilities such as scanners, date and time, and array lists.
5. For searching the tasks, we used Boolean to compare the task the user wants to search for and the task list itself.

Lesson learned:

The group began by covering the basics of creating the code, but upon integrating the task lists themselves, we decided to use an ArrayList so that the user will not be limited in adding their tasks to the array, also it is easier to work with since ArrayList has a built-in methods, which makes our program more flexible and user friendly compared to Arrays that are fixed size.
